

What affects our environment?

Year 3 have been looking at what affects our environment and the simple/easy things we can do to help out.

Together thought about

air pollution, water pollution, landfill, recycling, littering, vandalism, chemicals we use in our homes and many other areas. Year 3 couldn't believe how many things we could do to help. Year 3 loved litter picking

and doing their bit to clean up the world which

sparked a spontaneous desire to 'SAVE THE WORLD' as the children put it. I hope you continue saving the world each day!
