

Enrichment Day

We visited St. Aidan's for a curriculum enrichment day....

We got to be scientists in the labs with Bunsen burners and test tubes! We learnt about chemical reactions by mixing a range of different materials.

We had to measure accurately, mix and stir or shake and observe carefully. We noticed all sorts of changes: colour, smell, dissolving and fizzing.

We also got to be cooks in the kitchens and made butter shortbread. We learnt about hygiene and how to combine ingredients after measuring them carefully BUT we escaped the washing up!

But the best part of the whole morning was

eating the results of our hard work ... yum!
