

On The Campaign Trail

At St. John's we care about our local area and our local community. So much so, that we decided to apply for funding to install outdoor gym equipment in our local park. That way local residents would be able to exercise and stay healthy. They might also meet other like-minded people.

And so, off we went with our banners and placards to convince members of our community to vote for our proposals. On a cold, wet Saturday, we marched up and down Neasham Road. Life as a campaigner is sometimes tough—but lots of motorists gave us a beep!

We manned our stall with models to show off our ideas and even got some of our parents involved ...

All our hard work as project managers (researching, costing, graphic designing, advertising and promoting) paid off. Our bid won! We have now got £7,500 to spend on equipment. Watch this space for future developments
