

The children in year 1, have been working on their maths skills with the NumBot maths game. NumBots is all about every child achieving the “triple win” of understanding, recall and fluency in mental addition and subtraction, so that they move from counting to calculating. It has been designed with the Mastery approach in mind and the children will move through NumBots completing levels within each stage. The children LOVE to earn heads, arms, legs and bodies for their numbot as the work their way from the rust level, through iron, tin, brass, copper, steel, chrome. . . and beyond. The children use number lines, 100 squares, part-part-whole models, bar models other representations which really helps them become masters of number.
