

Year 1 Finance Project

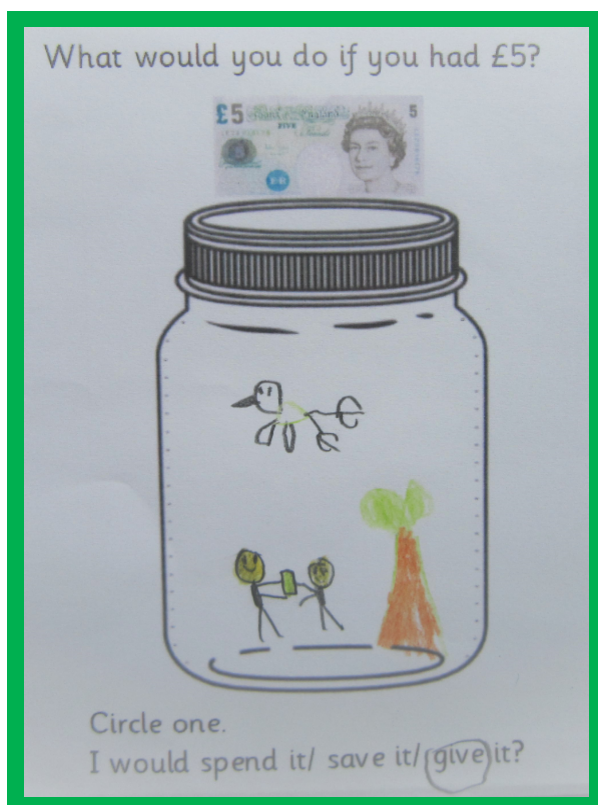

We thought about where we get our money from. We found out that people get money in different ways, for example doing jobs, for birthdays or for pocket money. We then had a very important discussion about pocket money.

Do you think all children your age should get pocket money?

Do you think pocket money is a good or a bad idea?

Do you think everyone should get the same amount of pocket money?

The children shared lots of different opinions.

We then thought about reasons that we give money. We shared our ideas about the different feelings that money makes us have.

Think about what your answers would be to these questions.

How would you feel if you had been given £5?

How would you feel if you had lost £5?

How would you feel if you had given £5 to help someone more in need than you?

How would you feel in everyone in the class had been given £10 but you had been given £5?
