

£ Year 3 Finance Project £

During our finance project, we had an interesting discussion about how much money people get paid for different jobs. We had a go at sorting jobs in order from those who we thought would get paid most, to those who would get paid the least. This activity made us think very carefully about what each job involved, in terms of responsibilities and the number of hours worked.

We were then given the job titles again - this time with the amounts earned each year, month and week attached to them. We were quite surprised, and this new information made us think again about how the amount you get paid, your responsibilities and the amount of time you spend at work all link

together. We learnt a lot during this activity, and it raised some interesting questions about different jobs and wages!

An Airline Pilot earns £48000 per year £4000 per month £923 per week
A Vet earns £40000 per year £3333 per month £769 per week
A Banker earns £35000 per year £2916 per month £673 per week
A Computer Games Designer earns £33000 per year £2750 per month £634 per week
A Nurse earns £28000 per year £2333 per month £538 per week
A Shop Manager earns £25000 per year £2083 per month £480 per week

I am surprised by the banker because I thought they would get paid more.
