

# STATES OF MATTER

Year 4 have been investigating different states of matter. They have been exploring different substances and considering their properties in order to successfully classify them. Can they be held? Can I pour it? Does it keep its shape? Does it fill the bottom of the container? Does it form a

The children used their fantastic observational skills to carefully identify properties and loved getting their hands stuck in! Some substances were trickier to classify than others. Jelly, shaving foam, pears and sand caused lots of debate whilst the children were unanimous with stones, juice and wood.
